

INNOVATION | LOCK EUROLOCKS

Finally we are able to communicate the novelty concerning locks in ZWICK mailbox banks. Expected from **1st August 2013** the new standard lock C912 will be used for all our mailbox banks. Reason for the change are an improved closure and a more comfortable closing behavior of the new lock, also with its modern optics it fits very good into the ZWICK design.

Here some technical data:

- The different locking locks have a cap and dust cover made of stainless steel and are supplied with 2 keys.
- The locking series features a new 180 ° closure with 2 positions to take off the key, 500 different closures and is ofcourse usable with master keys and also EN compliant.
- Another new feature is that the closing numbers no longer can be found on the lock rosette, but on stickers which are located inside the mailbox. In addition, the closure plans can also seen for you at any time from us.
